OBJECTIVE

I am looking to secure employment in Programming or Technical Support. I enjoy working as part of a team on projects and working independently using my own initiative. I've been working on creating my own projects since I first learnt coding and programming.

SKILLS

IT Literate
Meeting Deadlines
Motivated and Enthusiastic
Azure Services Experience
C# Experience
.Net Experience

PROGRAMMING EXPERIENCE

I made a discord bot that takes 50 varying commands which are tied to methods that when triggered would send an image or a message to the sender. The bot was roughly 800+ lines of code due to the amount of commands it features. The bot also has a re-connecting never timeout method to ensure its connection is remains intact. This was my first project so I spent a great deal of time bug fixing and due to this I have become proficient in bug fixing at a rapid speed.

I am currently working on a programme that teaches people Japanese as i found when learning the language that the resources available were not optimal for learning. This currently features form scaling and basic image processing. I have been working on performance increases adding features to make this programme more functional with user friendly icon buttons. This project is currently 90% complete and i am still working to further enhance this and put it through beta testing with trusted service users to provide reviews so I can resolve any problematic bugs before I make it available to the public.

I have further made a programme that allows access to multiple social media platforms at the same time in multiple windows on the same display page. I have created this as social media is a continuously growing platform and it will enable users to have multiple windows open without issues with display or load time. I am aiming to market this in the future as a way to further enhance the connectivity of social media platforms for socialisation and marketing.

EDUCATION

THINK EMPLOYMENT
I am currently working towards a Maths level 1 Functional Skills

GRIMSBY INSTUTE
IMI Level 1 Diploma in Transport Maintenance
English Functional Skills Entry Level 3

HOBBIES AND INTERESTS

I enjoy Gaming in both single payment and team player games. I also enjoy programing in my spare time and building programs to support easier use of

technology. I am also learning Japanese and I have been learning more about Japanese culture and music.
